CREATIA.

Weekly Report

Week:	Week 31 2024
Week Starting:	5th August 2024
Week Ending:	11th August 2024
Single Attacks Started:	3
Carpet Attacks Started:	0

Overview

Cumulative Size over Period:	0.058 Gigabytes
	1.178 Million Packets
Highest Attack Peak over Period:	0.053 Gigabit / Sec
	0.098 Million Packets / Sec

UNDERSTANDING THIS REPORT

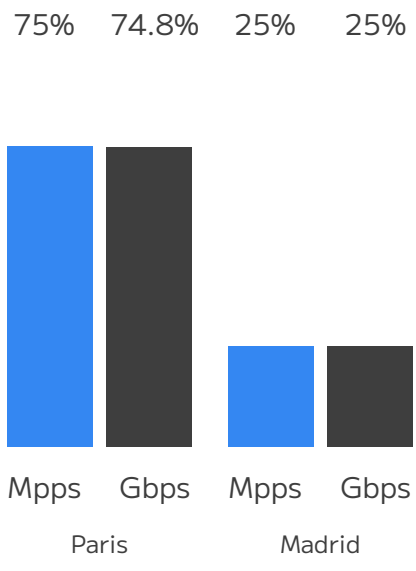

The metrics collected in this report are collected when our mitigation and monitoring systems detect an attack. We collect metrics using standard sampled flow methodology, and as such metrics are representative of data collected during sampling, which means that the information present in this report is best effort and you cannot expect a 1:1 overview for every packet that transits through our network.

Metrics shown in this report correlate to the traffic that transits through our mitigation appliances, and as such legitimate traffic will be mixed in with the illegitimate traffic.

This report contains the most significant information collected during our attack monitoring. As such, only the top five values for each section will be shown as anything outside of this has minimal significance. A further ten values are also named to give an understanding.

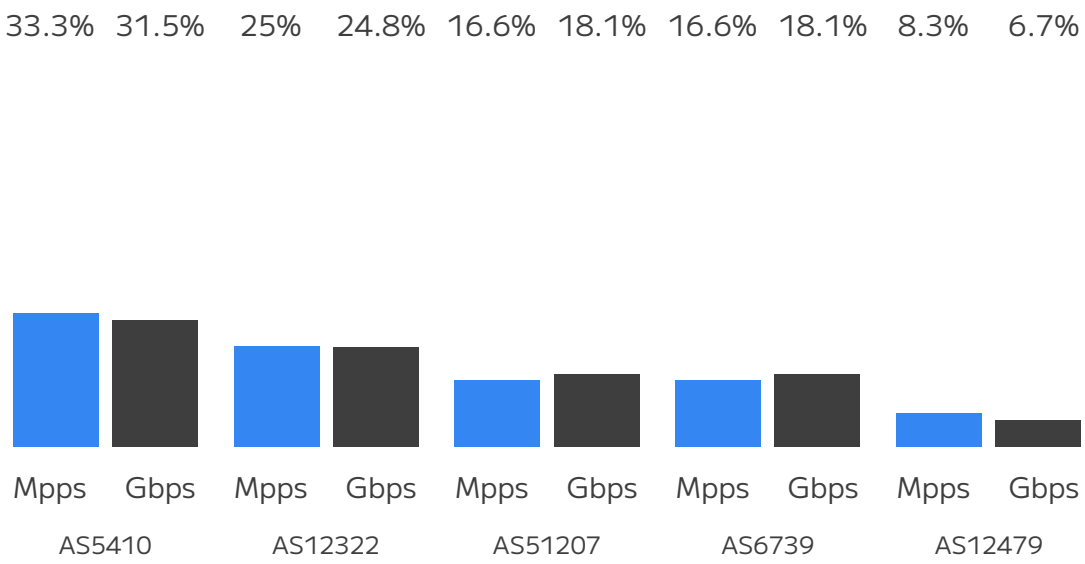

SCRUBBING SITE BREAKDOWN

The locations that the monitored traffic was scrubbed at.

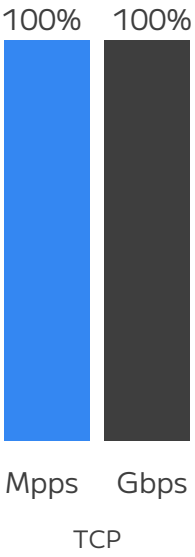

AS BREAKDOWN

The ASN's that monitored traffic appears to have originated from.

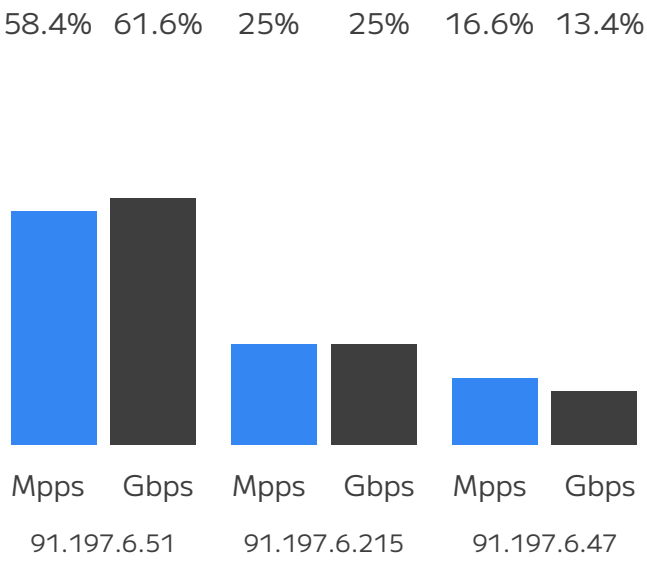

PROTOCOL BREAKDOWN

The protocol composition of the monitored traffic.

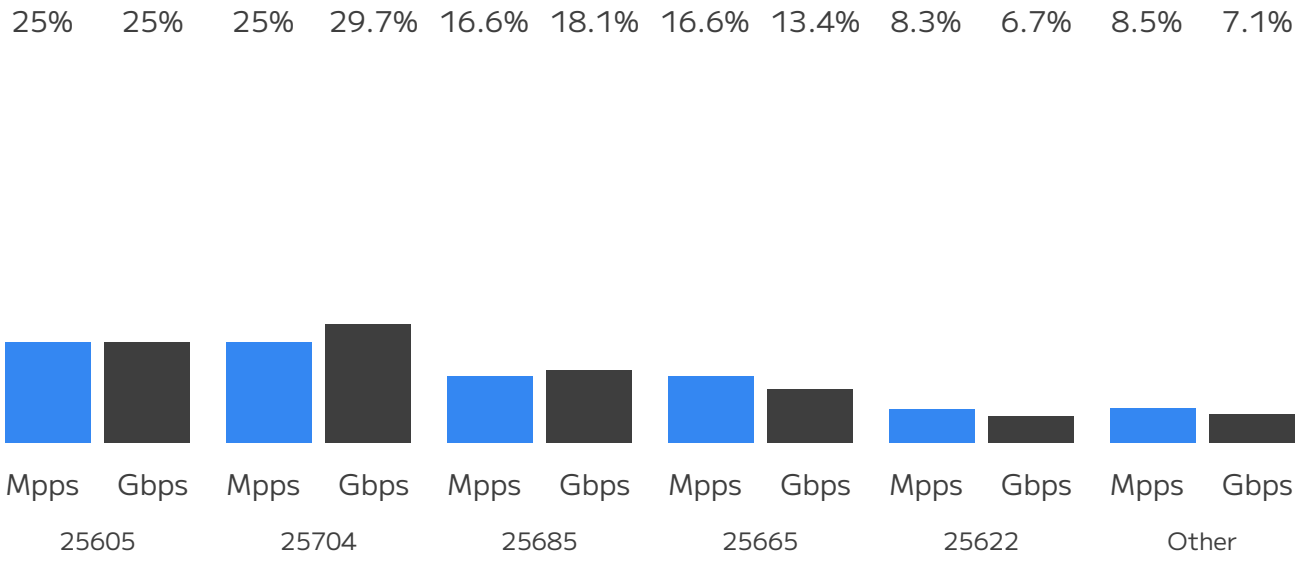

DESTINATION ADDRESS BREAKDOWN

The destination addresses that monitored traffic was destined for.

DESTINATION PORT BREAKDOWN

The destination ports that the monitored traffic was intended for.

*The other destination ports which have individually had less traffic than the top 5 consist of: 25638

ANALYSIS BY APPLIANCE REGION
